There is a potential big concern in the provided original b-actin blot for Figure 9A. The authors/journal say the blot on the right shows the original blot with two additional lanes on the right. But I see a box around those lanes that matches the published blot's size.

I mean, not as much contempt for the public's intelligence as claiming you have cured Alzheimer's with a femtomolar compound... but it's close 😏

It appears you're inventing things out of thin air again. It also appears the earth is flat. But when you look closer, you see the earth is actually round. If you look even closer, you will see that is it an ellipsoid. It appears you need some drugs yourself. Or maybe less 🤪
